PROJECTS

06/2020 – 07/2020
botFriends

https://github.com/molk95/botfriends
I have built a web app where users can view bots contacts from their names using a predefined API.
The Technologies I used are React, Node.js and Redux.

https://github.com/molk95/backendPrj
I have built a web application where users can to put their photos on our web application.
I have been able to create a login, registration, profile and home page that allows users to create an account and I am actually able to keep this information so that users can access their account.
The Technologies I used are React, Node.js and Redux, Express and Mongodb.
